

Introduction – Tin Plated Wire

Customized Tin plated oxygen-free copper wire and SCR copper wire provides superior characteristics as corrosion resistance and assistance in welding. The high-class copper materials we are using can be used for the drawing process of extremely thin wire.

Product application:

It is often used in calendaring wires and lead-in wires of electronic components.

Specification And Characteristics

Commodity	Diameter(mmØ)	Tensile Strength(N/mm ²)	Elongation(%)	Packing
TPA(soft)	0.40~1.20	< 300	> 10.0	Reel, Carton Drum
TPH(hard)	0.40~1.20	> 350	> 0.50	Reel, Carton Drum
